On-demand Webinar: What's New in Test Data Manager 4.10?

Join Broadcom Software technical leaders as they discuss this latest release and how customers can deploy TDM at scale, facilitate migrations of SAP applications and operate across a wide range of databases. Plus, our demo offers clear step-by-step advice. [Tune in](#)

White Paper: A CIOs Guide to Overcome Challenges of Security, Speed, and Quality with Test Data Management

Broadcom Software and Cigniti are uniquely positioned to help organizations address TDM challenges. Learn how their combined solutions speed delivery and minimize risk. [Browse this joint thought leadership study](#)

No Stress Upgrade to Service Virtualization 10.7.2

Our free Broadcom Software Designated Weekend Upgrade program helps you successfully move to Service Virtualization 10.7.2. Registered customers can contact dedicated support teams with any upgrade-related case from 8 am ET to 6 pm ET. It's easy to upgrade. No stress. No scrambling. [Check out the details.](#)

On-demand Webinar: Service Virtualization: Using APIs to Automate Virtual Service Creation & Deployment

As developers, testers, and agile team members leverage the power of virtual services, automation is key. In fact, if virtual services can be automatically created and deployed, it's easy to incorporate them into testing pipelines. [Join in](#)

and learn not only how to create virtual service deployments, but also how to automate them. Take advantage of the straightforward demo.

Blog post: 4 Key Reasons Service Virtualization is a Must for Agile Teams

Despite the proven advantages of service virtualization, there are still those who adamantly defend testing in a live system. The question is why does that conviction exist? Why trust that a live “Dev/QA/Pre-Prod” system is better for testing? [Read the four reasons why service virtualization is key.](#)

Blog post: Employing Agile Requirements Designer to Support API Testing: 5 Use Cases

If you're a current user of Agile Requirements Designer (ARD), you are most likely using ARD to design your functional tests. But did you know that you can use ARD to create API tests that can be executed with your test automation framework? [Leverage five use cases](#)

On-demand Webinar: No More Biases! Modeling Behavior, Not Test Pathways

When modeling your requirements, stop building decisions to invalid outcomes or to what the test automation framework should do in the event of failure. Avoid the pitfalls of a test pathway today. [Learn Best Practices in just 30 minutes.](#)

Video: Understanding Models and Perspectives in Model-Based Testing

Shared models enable teams to collaborate and derive a trusted definition of a system used to both design and test it. Learn what models do for us and how to make informed choices. [Watch now](#)
