

Top-10 Global Bank Selects Broadcom Portfolio for Transformation Strategy

DX UIM, AIOps, Mainframe and Security solutions – predictably priced and aligned to digital transformation goals — meet the bank’s cloud migration, agility, compliance, and financial objectives.

OBJECTIVES:

- Faster delivery of agile, API-based digital services
- Zero downtime, high resilience, zero trust security
- Integration and automation across hybrid cloud infrastructure

SOLUTIONS:

- Full AIOps, mainframe and security solutions
- Expanded mainframe consumption license

Top-10 international bank launched a digital transformation strategy to streamline payments, optimize platforms, and overcome regulatory and security challenges

Broadcom solutions aligned with the bank’s transformation goals:

- Software for agile operations
- Security and data protection
- Efficient operation across multi-platform cloud infrastructure

Unique benefits vs. alternatives:

- Integration for faster adoption than one-off point solutions
- Platform- and cloud-agnostic, for better coverage than restrictive big-company bundles

Broadcom advantages:

- Integrated, mature offerings
- On-premises + cloud coverage to meet EU requirements
- Global “big company” delivery, implementation, and support
- Predictable PLA pricing

Customer value:

- Major transformation savings
- Company-wide agility at scale
- Systematic cyber and data-protection compliance
- Improved resilience on multi-cloud platform
