SOLUTION BRIEF

KEEP YOUR APPLICATION PERFORMANCE MANAGEMENT ENVIRONMENT WELL-TUNED AND RUNNING FLAWLESSLY.

APM Solution Deployment: Technical Assessment and Health Check

Optimal deployment of Broadcom's Application Performance Management solution can enhance productivity, facilitate collaboration and drive operational excellence. It can ensure superior end user experience and lower MTTR for application performance issues.

Over time, technical environments and business requirements evolve so that the initial optimal solution deployment and configuration no longer matches current or anticipated requirements. For example, changes due to cloud initiatives, container and microservices deployments and mobile technologies can result in subtle or more significant solution misalignment.

This presents opportunities to tune the solution in ways that yields greater value.

- Improve solution performance
- Streamline administration
- Achieve enterprise scale
- Identify gaps in solution knowledge and usage

Organizations can benefit from insights of APM subject matter experts to evaluate their current situation and solution deployment. For already strained IT resources, performing a technical assessment and health check can be a daunting proposition.

The Broadcom team can help. Our APM Technical Assessment and Health Check is a no-charge services engagement available to Broadcom's strategic customers.

Highlights

- Results delivered in days, not weeks or months
- Technical assessment of APM in your environment
- Detailed reports with specific recommendations to optimize your APM environment
- Knowledge transfer covering APM best practices

Initiate	Gather Data	Analyze	Document	Present

Overview

In this engagement, our APM team follows a structured approach to assess your current APM deployment to identify short-term and longer term steps you can take to obtain full value from your investment.

Our team works primarily with your APM administrators and will work with other stakeholders in IT operations, with IT architects, application development teams and line of business owners.

THE BROADCOM TEAM CAN HELP. OUR APM TECHNICAL ASSESSMENT AND HEALTH CHECK IS A NO-CHARGE SERVICES ENGAGEMENT AVAILABLE TO BROADCOM'S STRATEGIC CUSTOMERS.

Assessments, which can be done on-site or remotely, will vary for on-premises and SaaS deployments. Generally, the engagement includes:

Deployment Architecture Review	Incident Analysis Workflow
Cluster and Agent Configuration Checks	Specific Recommendations and Best Practices
Log Reviews	Product Briefing: Solution Roadmap and What's New

Customer Prioritized Topics

For DX Application Performance Management and Application Performance Management (Classic) deployments.

OUR APM TEAM FOLLOWS A STRUCTURED APPROACH TO ASSESS YOUR CURRENT APM DEPLOYMENT TO IDENTIFY SHORT-TERM AND LONGER TERM STEPS YOU CAN TAKE TO OBTAIN FULL VALUE FROM YOUR INVESTMENT.
